DO YOU KNOW?

MAMMALS

c Look at pages 12–13. Read and write the correct word on the lines. The first one has been done for you.

fat

fur

hair

mammals

marine

warm

Most **1** *mammals* have fur or hair on their bodies. People do, too! It helps them to stay

2 in cold places. An Arctic wolf has two **3** coats. They help the

wolf to stay warm when it is very cold. Dolphins and whales are **4** mammals.

They are born with **5** on their noses, but they lose it when they are older.

They also have **6**, called blubber. This stops them getting too cold in the water.

3

a Work in small groups. Look at pages 14–15. Write four lists: *Cetaceans*, *Primates*, *Rodents* and *Ungulates*. Put the words below into the correct list.

apes

deer

dolphins

giraffes

mice

monkeys

rats

whales

b Work in your groups. Look at pages 18–25. Read and put a ✓ or a X in the boxes. The first one has been done for you.

- 1 Fish can breathe under the water but mammals cannot.
- 2 Humpback whales breathe in and out of a hole under their bodies.
- 3 Dolphins, whales and seals can stay underwater for one hour or more.
- 4 Bats are the only mammals that can fly.
- 5 Anteaters have teeth to eat insects, plants and fruit.
- 6 Chimpanzees use their faces and make noises to talk to other chimpanzees.
