Level 3

CLEVER PREY

Cuttlefish and Crab video (Book pages 6–7)

- <0:10> Lots of different animals live together in the coral reef.
<0:20> It is a good place to find a home,
<0:25> food,
<0:32> and a partner.
<0:39> But sometimes animals must fight for these things.
<0:45> It's not always easy to know who is the predator, and who is the prey.
<0:53> Cuttlefish like hunting crabs.
<1:22> But a large crab can be dangerous, because it has strong claws.
<1:29> The cuttlefish will have to be careful.

Desert Long-Eared Bat and Scorpion video (Book pages 22–23)

- <0:05> This desert long-eared bat is hunting a dangerous scorpion.
<0:22> The venom in its tail can kill a person.
<0:32> The bat is very small, but it is very hungry.
<0:41> It must fight and kill the scorpion.
<0:50> They start fighting ...
<1:02> ... and the scorpion strikes the bat on its head.
<1:10> The scorpion strikes again, but it doesn't stop the bat.
<1:45> It's the first of three scorpions the bat must eat tonight.

Weaver Ant video (Book pages 26–27)

- <0:10> A group of weaver ants is coming to fight another group.
<0:24> The ant on guard sees the danger ...
<0:37> ... and tells the others in his nest.
<0:44> The ants run out to fight, because they must keep their home and babies safe.
<1:15> They start spraying acid at the attacking ants.
<1:27> It hurts the attacking ants and they stop fighting.
<1:42> Now the ants can attack back and chase the other group away.
<2:00> Their home is safe again.
