ANIMALS HELPING ANIMALS

Level 4

Hunting Dogs video (Book pages 8–9)

- <0:09> While the other wild dogs go out to hunt, one adult stays behind to look after the babies.
- <0:33> But there is a big rock python near, and it is looking for food.
- <0:46> It can easily catch one of the baby dogs if it can get close enough.
- <1:07> The adult dog has seen the snake and tries to chase it away.
- <1:29> But the snake goes into the dogs' burrow.
- <1:45> So now the adult must take the babies to find a new, safer burrow before it gets dark.
- <2:02> The babies follow the adult on a dangerous journey across the open grass.

Meerkats video (Book pages 10–11)

- <0:14> Meerkats work together as a big mob to stay safe.
- <0:22> But there is always one female meerkat in charge. She will decide where to eat, where to sleep and what to do when things get dangerous.
- <0:50> One meerkat must always be on look-out to keep the mob safe.
- <1:06> The meerkat goes to a high place, from where it can watch the mob and see any predators coming.
- <1:18> The place must be high because predators can come from the ground or the sky.
- <1:27> It's a very important job!

Clownfish video (Book pages 24–25)

- <0:07> These clownfish live in a sea anemone.
- <0:14> In return for a safe place to live, they keep it clean, and take away anything that should not be there.
- <0:43> This male clownfish is looking for a safe place for the female to lay her eggs.
- <0:52> She needs somewhere solid.
- <1:11> He tries to move a shell, but it is too heavy – there is a hermit crab inside.
- <1:57> Then he finds an old plastic bottle.
- <2:09> But it is too light.
- <2:42> Finally, he finds a coconut shell. It looks just right.
- <2:58> But he needs help to move it.
- <3:09> The male and the female work together,
- <3:20> and take the coconut shell back to the sea anemone.
- <4:09> Now there's a safe place for the eggs.
