

DO YOU KNOW?

AT SEA

Video
Transcripts

Level 2

Additional: Watch the propeller under the water (Book page 13)

<00:00> sound effect of boat engine starting up and sailing off

The boat starts its engine ...

... and the propeller spins.

A boat with an engine and a propeller can move fast.

<00:00> The boat's engine is moving the propeller.

The propeller is spinning under the water.

Now the boat can move.

How does a car drive from the land into water (part 1) (Book page 21)

<00:00> This car is different to other cars. It is driving into the water.

<00:00> The car starts to float. It is a boat now. It has a propeller to move in the water.

<00:00> Now the boat is driving back onto the land.

How does a car drive from the land into water (part 2) (Book page 21)

<00:00> These people are in Iceland. They don't need to go in a boat.

<00:00> In this car, they can see the mountains ... and the sea.
