 Mars 1
 the Oort cloud 6
 Kuiper belt 5
- **3** 1 False (It comes up in the east.)
 - 2 False (It takes 24 hours for the Moon to travel around Earth. It takes one year for Earth to travel around the Sun.)
 - 3 True
 - 4 True
 - 5 False (The Parker Solar Probe travels at 586,000 kilometers a hour, but light travels at 299,792 kilometers a second.)
 - 6 True
 - 7 True
 - 8 False (The Milky Way is a galaxy, but there is a supermassive black hole in the centre of it.)
- **4** 1 d 2 f 3 e 4 c **5** b **6** α

VIDEO ACTIVITIES

Video 1

- 1 Learners' own answers.
- 2 1 takes off
 2 travels
 3 shakes
 4 pushes down
 5 stops
 6 takes

Video 2

- 1 A black hole is formed after a supernova.
- 2 At first, it is very bright.
- 3 It has a lot of gravity.

Video 3

- 1 1 Carbon2 Nitrogen3 Oxygen4 Phosphorus5 Sulfur
- 2 Learners' own answers.

Suggested answers:

The Mars Rover has six wheels and a camera.

It moves slowly and it takes photos. From the Mars Rover, we can see dry red rock and craters.
