

# DO YOU KNOW?

## WATER

Video  
Transcripts

Level 4

### **Water video 1 (Book page 11. What type of weather makes the lakes more colourful? What can people do in the lakes?)**

<0:09> Lakes can look beautiful in the sunshine.

<0:20> You can see the colours of the sky and mountains in the lake.

### **Water video 2 (Book page 17. How long will it take to reach the bottom of the Mariana Trench?)**

<0:10> The Mariana Trench is 200 kilometres east of the Mariana Islands.

<0:16> This is a submarine. It goes deep in the water.

<0:24> The scientists are trying to study the Mariana trench.

<0:35> It takes 4 hours to reach the bottom!

### **Water video 3 (Book page 27. Lake Chad is in which four countries? How big was Lake Chad 50 years ago in square kilometres? How big is it today?)**

<0:10> Lake Chad is a big lake in Chad, Cameroon, Niger and Nigeria. 45 million people live near it. It is important for food and water.

<0:26> 50 years ago, Lake Chad was 20,000 square kilometres. That's half the size of Switzerland! But today, it is only about 1,500 square kilometres.

<0:44> Since 2007, Lake Chad is getting bigger again. We must protect it so it doesn't get smaller again.
